

# Graduate Medical Education Safety-Net Consortium (GME-SNC)

Academic Health Centers' (AHCs) hospital-based, specialty-intense spirit of research, discovery, education and patient care delivered humbling medical advances during the Flexner era. Yet progress from discovery to care continuum has been notably slow, with escalating health disparities and increasing workforce shortages and maldistribution. Large-scale industrial changes are disorienting and chaotic; physician burnout is at an all-time high. Despite being an intensely change-averse industry, capitalistic forces are decentralizing healthcare, generating community-driven, innovative solutions for high performance and solvency.

Represents Faculty, Residents and Students

The GME-SNC nurtures an enriched community network of learning venues to improve care coordination and public health while well-preparing an inter-professional workforce. AHCs' self-directed transformation, through engagement in GME-SNCs as backbone organizations, can lead a fix for America's healthcare. The GME-SNC can inspire high integrity academic frameworks to build comprehensive networks of inclusive stakeholders aligned around shared purpose and mutually reinforcing action plans. Utilizing Institute for Healthcare Improvement's seven leverage points and high impact leadership models, the GME-SNC catalyzes large-scale healthcare transformation to address national healthcare workforce needs, to actuate the Triple Aim and to refuel meaningful professional practice.<sup>4</sup>
